Air Source Unit: 14kw ECODAN unit producing 100% of heating and hot water.

Comment:

“The customer request was to achieve the most efficient heating system possible and the highest insulation level possible for this grade 2 listed cottage located in the centre of the village. The air source heat pump was the perfect choice with its ease of use and comfort. ECODAN heat pump helped keeping the running cost to a minimum and take advantage of the RHI payments from OFGEM”
